

Become an Aquanaut!

Turn off the tap while brushing your teeth

Don't let water run when it's not needed.

Take shorter showers

Try to keep showers under 5 minutes.

Got a dual flush? Press the correct button!

There's a different button for a poo and wee. Press the correct button to save water!

Fix leaky taps

Tell an adult if you spot a dripping tap - it wastes a lot of water!

Use a bowl to wash dishes

When helping in the kitchen, use a bowl instead of running water.

Select the correct wash cycle

Remind adults to match the size of the laundry load with water volume.

Use leftover water for plants

If you have leftover water in a glass, use it to water houseplants instead of pouring it down the sink.

Use a refillable water bottle

Carry a reusable water bottle instead of buying single-use plastic ones - it saves water and reduces waste!

Catch rainwater

Suggest using a water butt or bucket to collect rainwater for garden plants or washing your bike!

Spread the word

Share water-saving tips with friends and family to make a bigger impact.

Become an Aquanaut!

Listen to the Aquanaut series, complete the challenges and save water!

AQUANAUTS

This is to certify that

is officially an Aquanaut!
